## EDUCATION

---

**Visvesvaraya Technological University (VTU)**  
*B.E. in Computer Science*

Bangalore, India  
*Jul 2015 – Jun 2019*

## EXPERIENCE

---

### Senior Software Engineer • Tricon Infotech

Jan 2021 – Present

*Client: EdTech & FinTech*

*Bangalore, India*

- **Architected and deployed 15+ high-availability microservices from scratch** on AWS ECS using NodeJs, Java/Spring Boot, maintaining 99.9% uptime SLA and processing ~500K daily requests across EdTech and fintech workloads.
- **Led Java 8→17 migration** across 8 services, eliminating deprecated API debt and improving runtime security and throughput by ~20%, with zero production incidents while mentoring 2 junior engineers, cutting their ramp-up from ~8 to ~4 weeks.
- **Designed and owned RESTful APIs** achieving sub-100ms p99 latency under peak load, reducing average API response time by ~30% through connection pooling and query optimisation.
- **Introduced Kafka-based async event pipeline** for loan status notifications and audit-trail events, decoupling 4 downstream services and cutting inter-service latency by ~40%.
- **Led SOX and SOC 2 compliance remediation** across 8 microservice repositories — auditing access controls, secrets management, and audit logging — earning formal client commendation.
- **Reduced infrastructure costs ~35%** by migrating Angular frontends to S3 + CloudFront, eliminating server-side rendering overhead and cutting average page load time by ~25%.
- **Implemented SonarQube quality gates** in CI/CD pipeline (GitHub Actions + Jenkins) across 15 microservices, reducing production defect escape rate by ~30% over two quarters.
- **Built full-stack loan processing React application** covering origination workflows, admin tooling, and reporting dashboards, reducing page load and API response times by ~25%.
- **Designed Oracle SQL schemas and DynamoDB tables** for high-volume transactional and NoSQL workloads supporting millions of daily read/write operations with sub-10ms P99 reads.

### Assistant System Engineer • Tata Consultancy Services

Jul 2019 – Jan 2021

*Client: Cisco Systems*

*Bangalore, India*

- **Sole developer of a resilient internal developer tooling SPA** using React, Redux, and Context API — delivered in 6 weeks as a fallback system enabling uninterrupted workflows for ~20 engineers when primary Cisco tools failed.
- **Integrated 3 REST APIs** to surface real-time system status dashboards, reducing average manual troubleshooting time by ~40% and improving MTTR for the engineering team.

## TECHNICAL SKILLS

---

**Languages:** Java (SE 8, 11, 17), JavaScript, TypeScript

**Frameworks:** Spring Boot, Spring MVC, Spring Security, NodeJs, Express React

**Cloud & DevOps:** AWS (ECS, ECR, API Gateway, DynamoDB, S3, CloudFront, Lambda, SQS), Docker, Kafka, Terraform, Terragrunt, GitHub Actions, Jenkins, SonarQube

**Databases:** Oracle SQL, PostgreSQL, DynamoDB, MongoDB, Redis

**Practices:** Microservices, Event-driven architecture, CI/CD, Agile/Scrum, SOX, SOC 2

## CERTIFICATIONS

---

Oracle Certified Associate, Java SE 8 Programmer
